

Experiment 4: Data Modelling and Form Design for Patient appointment form

Aim

To design a data model and user-friendly Patient appointment Form in Zoho Creator for storing and managing loan application details efficiently.

SCREENSHOTS:

This screenshot shows the 'Appointment booking' form in Zoho Creator. The form is divided into two main sections: 'Patient details' and 'Contact details'. The 'Patient details' section includes fields for 'Name' (First Name and Last Name), 'Age', and 'Gender' (Male, Female, Others). The 'Contact details' section includes fields for 'Email', 'Phone' (with a country code dropdown set to +91), and 'Address' (Address Line 1 and Address Line 2). The form is displayed on a mobile device screen, with a sidebar on the left showing the 'Appointment booking' form and 'Doctors' list. The top navigation bar includes 'Appointment booking', 'Appointment booking Report', and 'Doctors'.

Observation

The Patient appointment Form was organized into sections such as Personal Details, Contact Details, Income Details, and Patient Details. The data was structured properly, making data entry, storage, and retrieval simple and accurate.

Result

The data modelling and form design for the Patient appointment Form were completed successfully. The experiment showed that Zoho Creator helps create well-structured forms and organized data management with minimal coding effort.
