

LOW CODE – EXP 4B: Advanced Fields

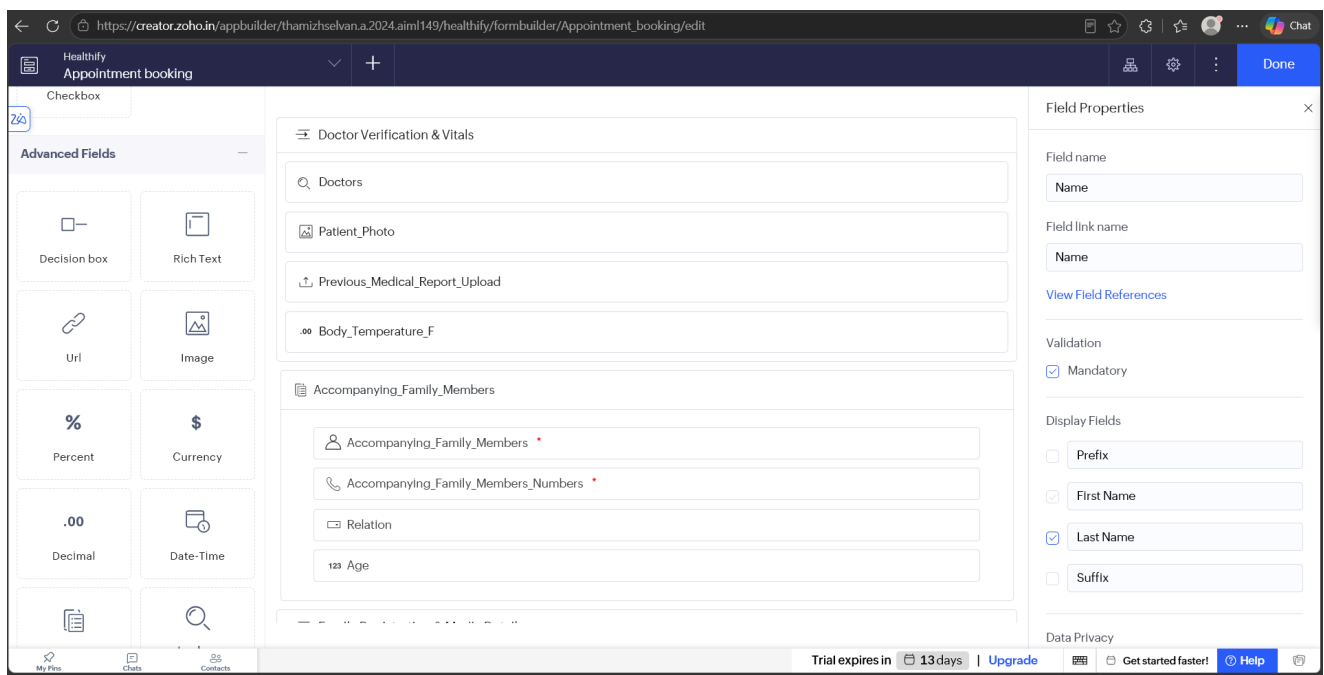

Aim

To extend the existing **Patient Appointment Booking Form** in Zoho Creator by incorporating the **17 Advanced Fields** to support doctor availability lookup, family member registration, fee calculation, file/media handling, digital consent, and automatic appointment ID and QR code generation.

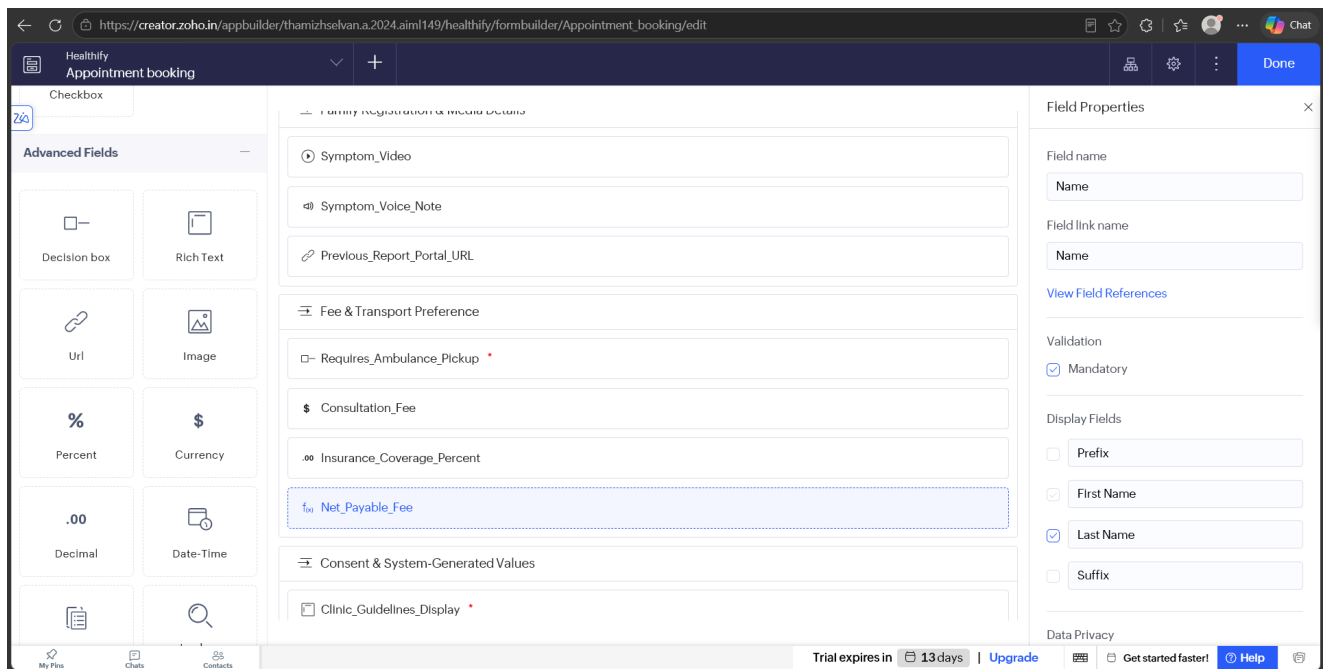

Procedure

1. Open the **Patient Appointment & Scheduling Management** application in Zoho Creator.
2. Open the existing Appointment_Booking_Form in Form Builder.
3. Add and configure the required **17 Advanced Fields**.
4. Configure the **Doctor Availability Lookup** to retrieve doctor details from the Doctors master form.
5. Add the **SubForm** to register accompanying family members.
6. Configure **Image, File Upload, Audio, Video, and Signature** fields for patient records and supporting documents.
7. Configure **Decision Box, Currency, Percent, and Formula** fields for ambulance preference and automatic net payable fee calculation.
8. Configure **Auto Number, Date-Time, and QR/Barcode** fields to generate the appointment reference, submission timestamp, and QR code automatically.
9. Apply the required validations, file-size restrictions, and field permissions.
10. Test the form using sample patient records and verify the Lookup, computed fee, Appointment ID, and QR Code.

Result

The **Patient Appointment Booking Form (Advanced)** was successfully extended with the required Advanced Fields. Doctor availability lookup, family registration, fee calculation, multimedia uploads, digital consent, automatic Appointment ID, submission timestamp, and QR code generation were configured and verified successfully.
