

LOW CODE – EXP 5: Patient Appointment Reports Suite

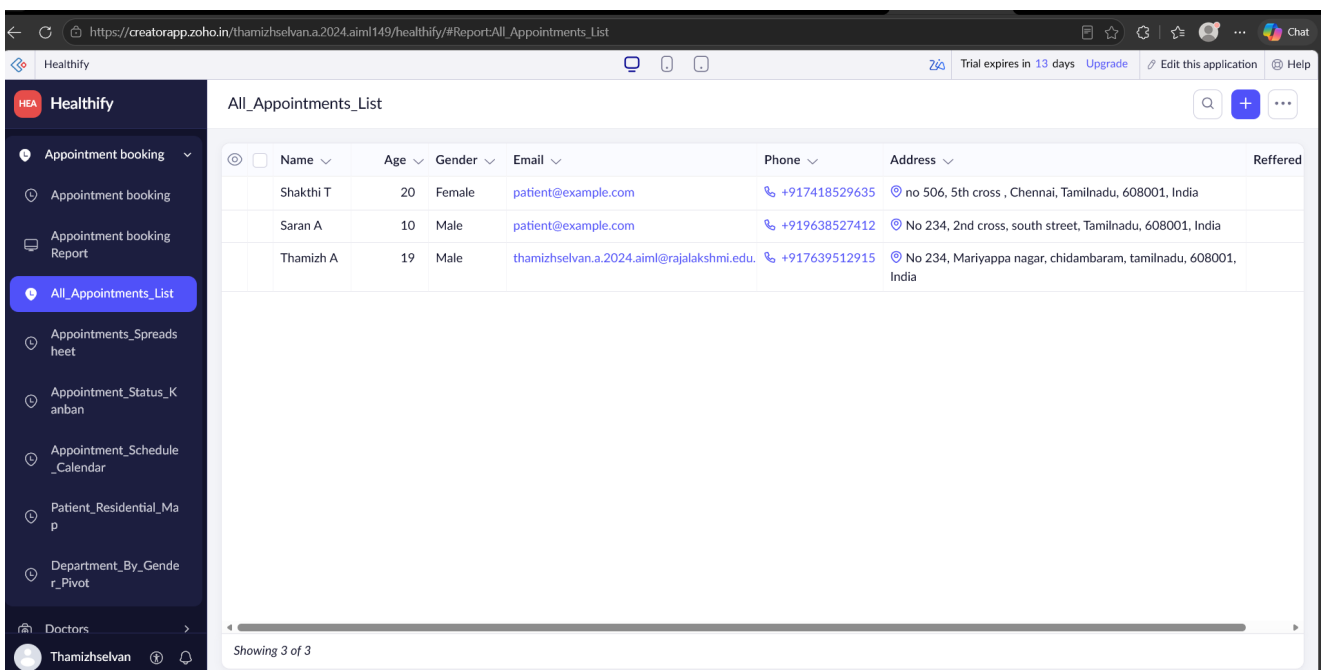

Aim

To design and build a complete suite of reports in **Zoho Creator** for the **Appointment_Booking_Form** using all nine report types: **List, Spreadsheet, Kanban, Calendar, Map, Timeline, Pivot Table, Chart, and Summary View**, to analyze and manage patient appointment data from different perspectives.

Procedure

1. Open the **Patient Appointment & Scheduling Management** application in Zoho Creator.
2. Select the existing **Appointment_Booking_Form** as the data source.
3. Create a **List View** to display appointment details with sorting and filtering.
4. Create a **Spreadsheet View** for bulk updating check-in, consultation, and payment status.
5. Create a **Kanban View** grouped by appointment status to track appointment progress.
6. Create a **Calendar View** using the preferred appointment date.
7. Create a **Map View** using the patient's residential address.
8. Create a **Timeline View** using the appointment submission date.
9. Create a **Pivot Table** to analyze appointments by department and gender.
10. Create a **Chart View** to display appointment count by department.
11. Create a **Summary View** to display appointment count for each assigned doctor.
12. Verify the reports using sample appointment records and perform the required interactions such as calendar drill-down and Kanban card movement.

Result

The **Patient Appointment Reports Suite** was successfully created in Zoho Creator using all nine report types. The reports provide different views for browsing, updating, scheduling, geographical analysis, trend analysis, demographic analysis, department workload, and doctor-wise appointment summaries.
